

Hamza Khalid

Laravel Developer

As a Laravel developer, I leverage this powerful PHP framework to create scalable, secure, and maintainable web applications. Laravel's elegant syntax and comprehensive tools, such as Eloquent ORM and Blade templating, enable me to deliver high-quality solutions efficiently.

PROJECTS

Management System

- In this project, we developed a comprehensive management system to handle large volumes of ISO certificates and provide integrated ERP solutions for businesses. The primary goal was to streamline certificate management, ensure compliance with ISO standards, and offer robust ERP functionalities to enhance operational efficiency.
- ISO Certificate Management
- ERP Integration
- User Management and Security
- Performance and Scalability
- User Experience and Interface

Tawakol

- WordPress Project.
- In this project, we managed an E-commerce store utilizing the powerful capabilities of WordPress combined with Woocommerce, a E-commerce plugin. The objective was to create a user-friendly, scalable, and secure online store that provides an excellent shopping experience for customers while simplifying the management tasks for administrators.
